

Pinesoft Professional Training Database

Network Version 12.6e (Access 2007/2010) : November 2011

Quick Update Guide for users of PineSoft Version 12.6a /b/c/d

(1) Back-end File : Pinedat_V12_6.accdb

Check Location of existing data file Pinedat_V12_6.accdb

With the PineSoft Main Menu displayed click Add-Ins > Tools > Attachments - Verify All

The Current Location should show your Network designated area - make a note of this.

Your back-end data file contains all your data and doesn't require updating.

(2) Front-end Updated File : Pinesoft_V12_6.accde

Check the location of your existing front-end file Pinesoft_V12_6.accde, typically,

C:\Users\{UserName}\AppData\Local\PinesoftNet\Pinesoft_V12_6.accde

- rename the file to Pinesoft_V12_6_old.accde, and then copy your new updated front-end file Pinesoft_V12_6.accde

To launch the application, open Access 2007 and then open the front-end file Pinesoft_V12_6.accde. (Alternatively use an existing PineSoft shortcut)

- on the first occasion you will be prompted to browse and attach to the back-end file Pinedat_V12_6.accdb

To update additional PC's simply copy the file Pinesoft_V12_6.accde, on the updated PC to the installation directory on other required PC's.

(3) After updating with PineSoft loaded, you may use the :

Add-Ins > Help > About PineSoft dialog - it should indicate V12.6e

(4) For a full re-install on a new PC please refer to the full Installation Guide on the PineSoft CD.
